Suppose you purchased all of your monuments from a foreign country. Or, you purchased all of your monuments from a sales person who in turn bought the monuments from a foreign manufacturer. What kind of service would you get if you called (collect) your manufacturer in India, Portugal, South Africa, Sweden?

If every American retail monument dealer relied on a foreign supplier, the monument business in the United States would go into bankruptcy and disappear. No monument manufacturer in Barre or Elberton or Wisconsin or Minnesota or South Dakota would remain in business. If retail dealers purchased their finished monuments from a distributor who obtained them from a foreign country you would automatically and quickly destroy forever the monument manufacturing business in the United States. All of the quarries in the United States that rely on the monument business would go out of business.

Even if you and your fellow retailers purchased only 10% of your monuments from a foreign supplier this would place the United States monument manufacturing and quar-rying business in serious financial difficulties.

As you know, we are a small industry. If we put all American retail monument (continued on page 25)
Gardner Walker has been with the Barre Guild Consolidation Service for the past 15 years. Prior to that he was a trucker—hauling granite around New England for nearly two decades. So, he knows the trucking industry very well.

But, perhaps more important, there are scores of truck drivers across the country who know Gardner Walker very well. Gardner is very well liked and highly respected by many truck drivers who ply our nation's highways.

"Gardner? We think he's one hell of a nice guy!"

That respect and admiration for Gardner became very evident recently. It all started out to be a "routine" summer day at the Barre Guild Consolidation Service, but when the day ended, the usually unflappable terminal manager became rather, well, flappable.

The huge 18-wheeler casually rolled into the terminal yard and headed straight for one of the terminal bays and delivered a very large wooden box. And that was the end of the "routine" day.

The huge box was ten feet long and five feet square and was built with 2x6 lumber. It was marked with large black letters that spelled: "C.O.D." and Gardner's name was stenciled on the box.

One glance at the box and Gardner leaped into the air. "I ain't payin' for a blessed thing!!!" he roared. "No Sir!!"

(continued next page)

"Gardner? That son of a gun? He's just about the best there is...and don't forget it, either!!"
"Gardner? He's everybody's friend."

After being assured the enormous wooden box was indeed for him without having to pay for it, Gardner armed himself with an iron bar and proceeded to investigate its contents.

It wasn't too long before Gardner pried loose enough boards to reveal a golf cart! Not just any golf cart, but one that had been fashioned with painstaking care and skill.

According to Dave Draheim, Terminal Manager for Anderson Trucking in Manitowoc, Wisconsin, the golf cart is the culmination of a project that began eight to ten years ago.

"A bunch of us guys used to run up there (to Barre) over the years and we felt that Gardner was a 'good ole boy,' y'know what I mean? Gardner has done many good things for all us drivers over the years and the drivers asked each other what they could do for him. Well, I was talking with Gardner in his office one day a few years ago and learned he liked golf. So, I kept my eye open for a golf cart."

"Gardner? There's not a better guy around."

"I found just the one in Pennsylvania. I brought it back here (Manitowoc) to put it in shape. It was old and needed work but I have a professional body person in my terminal and he spent his spare time fixing it up. The other drivers kicked in to cover expenses and a shipper friend of mine made the box."

"And we whipped one on him," laughed Draheim. "Yessir, we just whipped one on him. And he deserves it!!"

Gardner's reaction? "I was just plain speechless. I was really shook," he whispered.

It didn't take Gardner long to take his new toy on its maiden voyage—around the terminal yard.

"WOW!! This is really something!" he shouted. And, in the next moment, as he sat looking at the special plaque built into the steering wheel, he slowly shook his head and softly said, "Someone really cares."

Above: "Easy now, don't scratch the paint."
Below: "Boy! I just can't wait."
(Ed note: Gardner Walker is not only well known and respected by scores of truck drivers, but monument retail dealers west of Ohio and south of Virginia also know and respect Gardner for his consolidation and handling of their priceless freight—beautiful granite monuments manufactured by members of the Barre Granite Association. An example of that respect and appreciation is reflected in this letter.)

Mr. Bob Stewart  
Barre Guild Freight Service  
Barre Granite Assn.  
P.O. Box 481  
Barre, Vermont 05641

Dear Mr. Stewart:

For some time we have been meaning to write you about the splendid service we receive through your office and from Mr. Gardner Walker in particular. Mr. Walker has saved us many hundreds of dollars because of the way he has consolidated our shipments and because of the suggestions he has made to us concerning our freight handling. In addition, he calls when he sees granite being held too long because of insufficient weight to appraise us of the fact and ask for instructions.

Respectfully,

Frank Troost

"This speaks for itself."

"A great place for my scorecard."

THINK I DRIVE BAD? YOU SHOULD SEE ME PUTT...
Member companies of the Barre Granite Association met recently for their annual meeting to approve budgets and to elect new Trustees.

Paul Savard, President of Thurber Granite Company presided as BGA President at the meeting. Trustees elected were: Lucien Rouleau, President of Rouleau Granite Company; Charles Chatot, President of North Barre Granite Company; Kurt Swenson, President of Rock of Ages Corporation; and Norman Beck, President of Beck & Beck, Inc.

Milton V. Lyndes was re-elected as Corporate Secretary and Executive Vice President. John Salvador was re-elected BGA Treasurer.

Left to Right in the photograph are: Norman Beck; Brent Buttura, President of Buttura & Sons, Inc.; Nick Cetrangolo, President of Cetrangolo Finishing Works; Milton Lyndes; Paul Savard; Charles Chatot; Lucien Rouleau; and Kurt Swenson.
Jones Brothers Dark Quarry Is Reopened

For the first time in 50 years granite is again being quarried at the Jones Brothers Dark Quarry near Barre.

James Kelley, President of Jones Brothers said the reopening of the quarry will help provide a wider variety of granite to manufacturers and eventually to retail monument dealers.

Jones Brothers, a former granite manufacturing firm in Barre, also owns and operates the Wells Lamson Quarry Company in Barre.

According to Charles O. Peterson, Vice President and General Manager, "We've decided to have a look at the stone to determine how fine the grain is. We also intend to check its market quality and take a close look at the economics of quarrying the dark granite on a regular basis."
A bird’s eye view of the Gibson Quarry, recently purchased by the Vermont Quarry Company. The quarry is being reopened after 18 years of inactivity.

New Quarry Company Formed

A group of local granite manufacturers has announced the formation of the Vermont Quarry Co., Inc. (VAC).

Paul Savard, President of the new company and owner of the Thurber Granite Company, said the Vermont Quarry Company has purchased the Gibson Quarry located on Blue Mountain in South Ryegate, Vermont. The Gibson Quarry was operated from 1906 to 1966, and offers a light to medium, gray granite.

Savard said exploratory operations will begin immediately, and the firm hopes to offer the local granite industry an economical gray granite by late this fall or early next spring. Savard said, “The new granite will not, in any way, replace Select Barre Granite as the premier gray granite for monumental purposes. It is meant to be an additional gray granite which should allow local manufacturers to enter new markets in which they are not currently competitive due to high raw material costs.”

Inquiries regarding the new company should be directed to The Vermont Quarry, Co., Inc., Box 543, Barre, Vermont, 05641.
Passing The Mantle At Adams

Kerry F. Zorzi, 25 (right) and his dad, Elgio Zorzi, President of Adams Granite Company. Kerry recently joined his father's company and will eventually purchase full interest in the BGA-member firm.

Kerry is a graduate of Bentley College and is a Certified Public Accountant. For the past four years Kerry has been employed by an international public accounting firm. Kerry resides in Barre with his wife, Cheryl and daughter, Cristina.

Elgio, who will retire soon, began his employment with Adams Granite Company in 1945 under the supervision of the company's founder, Adam Podskalny. Elgio purchased full control in 1960. Under his supervision the company made many improvements including the installation of machinery designed to increase the production of granite memorials.

"We have always specialized in first class monuments and duplicate markers," Elgio said. "We have always stressed quality in stock and workmanship and I'm very pleased Kerry feels the same way. I know he intends to oversee operations personally and he will keep in personal contact with his customers."
**New Personnel And Corporate Changes**

The President of WELLS LAMSON QUARRY COMPANY, James Kelley (center), has announced the appointment of Charles O. "Chuck" Peterson as Vice President and General Manager of the BGA-member firm. Peterson was formerly Managing Director of Fairmont Granite Company in Beebe, Quebec, Canada. Dan Rubalcaba (right) is the new Corporate Controller and an officer of the company. Wells Lamson quarry is the oldest operating granite quarry in the United States.

**Conrad Rowell Joins Beck & Beck**

Dick McBride, Manager of Sales and Advertising for Beck & Beck, Inc., has announced the appointment of Conrad Rowell to the firm's Customer Service Department. Rowell is well known in the Barre granite manufacturing industry. He has spent fourteen years with the Rock of Ages Corporation and has also held the position of Sales Manager for Cook, Watkins & Patch. McBride said Rowell will "definitely be an asset to our company and our customers. We are pleased to have him with us."
Benefits From Buttura

A major benefit for customers of BUTTURA & SONS is their increased production efficiency with this new Ordway radial saw. With a capacity to cut through three-foot slabs on a ten-and-a-half-foot bed, this saw is used primarily to make joints and markers. Leo Buttura, Jr., Vice President and Production Foreman checks a status report with Bill MacAskill.
C.R. Davidson Expands Production

Clyde Davidson, owner and President of C.R. DAVIDSON COMPANY of South Ryegate, Vermont, explains the operation of his new Hydrasplit Diamond saw. The saw has the capacity to cut granite 33-inches thick and 14-feet in length. Mr. Davidson said his BGA-member firm has greatly increased its production capabilities with the installation of this new equipment.
A Memorial To A Legend
In The Deep

On the shores of Lake Champlain in the City of Burlington, Vermont, is a monument dedicated to America's answer to the Loch Ness monster.

Named after the lake in which it reportedly resides, Champ has been talked about by thousands of people over the years and seen by only a few. Although there is no clear, precise picture of the denizen of the deep, Champ's sighters claim he (or she) is for real. The first reputable sighting was in 1819 and since the early 19th century Champ has been spotted a reported 225 times.

This monument, 3-0 x 0-10 x 2-6, was donated by Rock of Ages Corporation for the Vermont Lottery Commission as a part of the Commission's promotion of its new lottery game, "Search for Champ."

The monument is "Dedicated to Champ. Buela Aquatica Champlainiensis and those people in Vermont who have sighted Champ and are in search of Champ."

BGA Helps To Get Out The Vote

Milton V. Lyndes, Executive Vice President of the Barre Granite Association (right) presents a check for $100 to the Vermont Secretary of State, James H. Douglas as the BGA's contribution to a nationwide campaign to get out the vote in November. Looking on is Christopher Barbieri, Treasurer of the Vermont Voter Education Project. According to Secretary Douglas, only 53.9% of the eligible voters in the United States went to the polls four years ago, while in 1982, only about 40% of the voters elected the U.S. House of Representatives and 33 U.S. Senators. Mr. Lyndes said, "The BGA contribution will help fund an educational project supported by the National Association of Secretaries of States and the Advertising Council aimed at increasing voter registration, voter turnout at the polls and citizen participation in government at all levels."
Rock Of Ages Announces Appointments

Rock of Ages Corporation has announced the appointment of Keith H. Hudson as Director of Quarry Operations in the United States. Hudson assumed his new duties, filling the vacancy caused by the untimely death of John “Jack” Corrigan, Vice President of Quarries.

Previous to his new position, Hudson was Director of Industrial Relations. A native of England, Hudson joined Rock of Ages in 1980 as Director of Management Development and Systems.

Rock of Ages also announced the appointments of J. Norman Dion as Customer Services Manager for the Barre quarries and Andrew H. Carpenter as General Manager for Quarry Sales and Administration.

Dion's duties will include responsibility for quarry rough stock sales along with the off-hill trucking. Carpenter's new responsibilities include all quarry sales and marketing programs as well as administration.
SALESemen on the road

Edward A. Carroll Company

John E. Kinney, on the left, an independent granite manufacturers representative is with James F. McGarity, Jr., of Edward A. Carroll Company of Bala-Cynwyd, Pennsylvania. Mr. Kinney represents several members of the Barre Granite Association in his travels through Pennsylvania, New Jersey and parts of Maryland.

Desch-Paine Monuments

Left to right, Van White and Bob Fox, partners in the firm of Desch-Paine Monuments in Grand Island, Nebraska with Dale Walton, manufacturers representative for Beck & Beck, Inc., a member of the Barre Granite Association. Desch-Paine Monuments has one of the most modern facilities in the country featuring this indoor display and office area plus a large outside display and a large stock of monuments in varying shapes and sizes.
Denis Roy, new owner and President of Peerless Granite Company.
One of Barre’s oldest and most respected granite manufacturing firms is now under new management.

Peerless Granite Company is now owned by Denis and Chris Roy who recently purchased the BGA-member firm from Donald Fonatana.

Denis is not new to the granite industry—nor is he a stranger to the operations of Peerless Granite Company. As a teenager he worked for his father in his polishing mill and he has operated virtually every machine necessary in the manufacturer of monuments. Eight years ago he began his tenure as Foreman at Peerless. Four years later he purchased stock in the company and became Vice-President and Plant Manager of the company he now owns.

Denis is a life-long resident of Barre. His attractive wife Chris is a registered nurse by profession, but has been doing executive secretarial and bookkeeping work for the past three years. Hers is the voice you hear when you dial the Peerless Granite Company.

Three Very Gifted Children

Denis and Chris are very proud of their two sons and their daughter. Christopher, a junior at Harvard University majors in government with hopes of law as his graduate degree. Gregory is a junior at Spaulding High School looking toward a career in architectural engineering. Cynthia is a freshman at Walnut Hill School in Natick Massachusetts where she will be a ballet major. She has already performed with the Berkshire Ballet in Massachusetts and the New York City Ballet.

New Office Manager

Denis and Chris bring a new Office Manager to Peerless. He is William Binaghi who will also be the firm’s estimator. Bill is also a life-long resident of Barre with a long family history in the granite industry. He is a draftsman by trade, but also has worked in many facets of the industry. Denis says Bill comes to Peerless very well qualified.

Eighty Three Years

In 1901 Peerless Granite Company, Inc., began operating as a granite manufacturing firm. From the beginning, Peerless has enjoyed a fine reputation for quality products that have endured through the years. All types of work, from elegant mausoleums to cemetery features to standard monuments have been and still are routine at Peerless.

Through the years two additions have been made to the original structure to better handle a growing business. In recent years much emphasis has been placed on more modern machinery and an elaborate conveyor system for improved efficiency. The office, with the help of computers has become quite effective.

"Peerless Granite Company has enjoyed much success in the past," say the Roys, "and it will continue to do so for many years to come."
SMITH, WHITCOMB & COOK

Changes Hands

Smith, Whitcomb & Cook, a sustaining member of the Barre Granite Association and one of the major suppliers to the Barre granite industry has been sold to Cynthia and Booth Martin of Barre.

Smith, Whitcomb & Cook, founded in 1833 (and featured in the Winter, 1983 issue of Barre Life) is a multi-faceted business with foundry, sheetmetal, machine tool and saw mill manufacturing operations.

Mr. Martin said the only changes anticipated will be one of direction. "It's a strong company. It's traditionally done excellent work. We have a fine staff. I hope to hire more after we do some more work."

Mr. Martin said he has been interested in the company for more than 20 years. He is also treasurer of the Hill-Martin Corporation, a large road equipment and parts company.

Below: Cynthia and Booth Martin, new owners of Smith, Whitcomb and Cook, stand in the foundry area of their newly acquired business. Opposing page: A view of the interior of the machine tool area of Smith, Whitcomb & Cook. The polishing wheel, made in the foundry, received its finishing touches on the lathes in the background.

"It's a strong company. It's traditionally done excellent work."

Lawson Granite Company—An Investment In Efficiency

Above: Jim Moulton, Sandblast Department Foreman cuts stencil on a monument in preparation for sandblast carving. The end result will be a beautiful cross with entwined roses and a simulated brick effect. Below: The efficiency of the investment in a remodeled sandblast production line is graphically shown here with Gilles Pepin (L) and Jim Moulton, Sandblast Foreman cutting stencil as memorials are prepared for shaping rooms.
Sandblast carving... beautifully created in Barre... a product of deep concentration, patience, and skill.

Lawson Granite Company, well known among retail monument dealers for its sandblast carving has recently renovated its production line through the entire sandblast department.

According to Mark Gherardi, plant manager, "This new setup will enable us to greatly increase our production through our sandblast area. We now have the capability of completing a high priority order without disrupting the entire sandblast production line."

"This is another example of our commitment to make investments in our plant that will give our customers the benefit of our efficient production," he added.

Below Right: Lawson Plant Manager, Mark Gherardi transports a large upright monument on the overhead crane from Sandblast to the Washing and Boxing Department. Note the sandblast carvings on the memorials at the washstand. Below: Mark Gherardi, Lawson Plant Manager (R) discusses the finer techniques with Jim Moulton, Foreman of the Sandblast Department.
“Doug’s job is to prepare work for the men and machines in the plant.” The words are from Joe Mureta, President of Montpelier Granite Works and he is speaking about his son, Douglas, one of two sons to join him in the operation of this BGA-member firm.

“The movement of granite through our production line is our life blood!” emphasized Joe, “and a part of Doug’s responsibilities is the movement of that granite. He must prepare the daily production routine and he must have the granite at a particular place at a certain time for specific production work.”

The task is certainly not easy, but Doug is handling his important responsibilities in an efficient and capable manner. Doug has spent the last four years working for his Dad who is very respected granite manufacturer and whose firm has established a fine reputation among many retail monument dealers for quality work.

Doug’s brother, Dan, has been with the firm for six years as Sales Manager.
Above: Doug is reviewing final measurements on a slab of granite. This is just one of his many responsibilities at Montpelier Granite Works. Below: Doug and Joe team up to “score” or “mark” a small slab in preparation for splitting it on the guillotine. Their teamwork is just one of the several reasons for the success of Montpelier Granite Works.
The Reverend Richard Tosh and Sally Cary talk to members of the Barre Congregational Church during ceremonies dedicating a new memorial to the first pastor of the church.

HONORING OUR HERITAGE

by Sally Cary
(Special to Barre Life)

Elmwood Cemetery in Barre is an expansion of the original Gospel Village Church burial ground. The first settlers, early quarriers, farmers and business people are interred here. It is a capsule history of the growth of the Barre area and Central Vermont.

In the spring of 1983, the Barre Granite Association suggested to the local Historical Research Committee of the Aldrich Public Library that a self-guided walking tour of Elmwood Cemetery in Barre would be a worthwhile project. The committee enthusiastically agreed. It proved to be an interesting and educational effort.

The object was to research the men and women buried here and to record their contributions to the economic and social life of the town and to identify the various styles of memorial art from the early colonial slate or marble tablets through the romantic motifs and symbolism of the mid-19th and early 20th century to the contemporary designs of today.

In the course of the committee's research, the burial site of the Rev. Aaron Palmer, the first pastor of the Gospel Village Church, now the Barre Congregational Church UCC, was located.

Private monies were raised by members of the Barre Congregational Church UCC to replace the original badly weathered marble tablets with a single granite monument to memorialize the first pastor of the present Barre Church and his family.

Granite was chosen to replace the original tablets because of the durability of granite for honoring our forebears. For historical purposes, the back of the new memorial is marked "Dedicated June 17, 1984, this tablet was installed on the original base to replace three marble tablets."

With advice from Melvin Friberg, President of Anderson-Friberg Company, and a generous contribution from the BGA-member firm, the two remaining tablets and the granite base were removed and a new granite monument was manufactured.

The Gospel Village Church was organized November 14, 1799. The small congregation of approximately 30 families met in private homes. In 1804 the members decided to build "a house" on the common in Gospel Village, now the general area where Washington, Hill and Camp streets intersect. Ezekial Wood, a deacon of the church, gave three acres of his farm land for the new church building and burial ground. The building was completed in 1808. The Rev. Aaron Palmer was called as the first pastor of the new church and was ordained February 12, 1807. He continued to serve the parish until his death February 7, 1821. Aaron Palmer studied theology under Reverend Asa Burton, a minister in Thetford, Vermont. Reverend Palmer, as pastor of the newly organized congregation, also served as president of the Barre Auxiliary of the Vermont Domestic Missionary Society in 1819.
A Memorial
To
Italian-Americans

Next year a 12-foot Barre granite statue will be unveiled in Barre "in honor of all Italian-Americans whose achievements have enriched the social, cultural and civic vitality of this city, region and state." The special memorial will be "erected by their descendants and friends."

The design concept was created by Barre designer Elmo Peduzzi. The model was created by Giuliano Cecchinelli and the carving will be done by Philip Paini of Barre.

Italian craftsmen, famous for their artistry and sculpting, came to the Barre granite industry by the hundreds before the turn of the century to begin their new lives in a new land.

Here, sculptor Giuliano Cecchinelli is shown with his four-foot model.

The Publisher Speaks (con't. from page 2)

dealers and all American monument manufacturers together in one place the total population would be no bigger than a large town. Most of us personally know each other. Even those who compete with one another have some basis for personal friendship.

Monument quarriers and manufacturers in foreign countries are able to produce monuments more cheaply than we could ever do it in the United States. Some workers are hired for as little as $1.00 a day. I have even seen small children in India working in the quarries. Although we have the most modern machinery here in our monument centers, we could never begin to compete with the poverty level wages paid in some of these foreign countries that are producing monuments for export. We believe in the free enterprise system, and we believe that American industry must have the ability to produce in order to have the privilege of loyal customers. However, I will state categorically that American monument producers cannot match these foreign producers because it would be illegal (not to say immoral) to subject our workers to the pay scales, the working conditions, and the kind of social atmosphere necessary to meet that competition.

How do you as a retail monument dealer feel about this question? I am interested in your thoughts. I am interested in your welfare, but I am also deeply concerned about all manufacturers and quarriers who provide you with the product here in the United States.
The Brunner family monument was manufactured by NORTH BARRE GRANITE COMPANY. The sculpture and etchings were done by Alcide Fantoni. This special memorial features a sculpture in a niche on the front and an etching of Pope John Paul II on the back. This monument measures 9-8 x 1-0 x 5-6. The title page photo (left) shows Mr. Fantoni applying the finishing touches on his etching of Pope John Paul II.
The Ballou monument was produced by ANDERSON-FRIBERG CO., INC., in a reduced size as a companion monument for relatives of the McAllister family.
Designed and created especially for Bertacchi & Son Company, Hillside, Illinois, by DESILETS GRANITE COMPANY of Montpelier, Vt., this Midnite Opal family monument features the Pieta etched by Edward Epstein. This memorial measures 6-6 x 0-8 x 3-4.
This lovely monument was produced by ADAMS GRANITE COMPANY for Abington Monuments of Chinchilla, Pennsylvania. This polished Mahogany granite memorial with an axed apex top also has a $\frac{1}{2}" \times \frac{1}{2}"$ carbo groove on four sides and features sandblast carving and lettering. The monument measures 2-6 x 1-0 x 4-6.
CHIOLDI GRANITE CORPORATION manufactured this family monument for M. Vozzella Memorials of Medford, Massachusetts. This Barre granite memorial, measuring 4-0 x 0-8 x 2-10 features sandblast carving of the letters and symbols and is both polished and steeled on the front.
